

Hello again!

By now you should be getting ready to watch the first video of my "junk" into gold ebay system. So I wanted to add my personal words of encouragement – and issue you a special challenge.

First, let me re-emphasize:

You Now Have Access To A Very Powerful, Proven Program For Making Money From Home

By watching the videos and implementing the strategies as directed, you'll master the process necessary to achieve success on ebay.

Now, my ebay system gives you a winning game plan. It works for me and for thousands of other ebay sellers. It's been proven time and time again to produce fantastic results. So now, all you have to do is execute! And that brings me to the second thing I wanted to talk with you about:

The Temptation To Quit

Even though this money-making system has been wonderfully designed to help you master the process of selling on eBay as easily as possible, it still requires some dedication and persistent effort on your part.

Have you ever heard the saying, "Quitters never win and winners never quit?" Well, with that in mind, I'm going to say something now that may shock you: we're all quitters! And the sooner we realize it, the better. Then we can get on with the business of overcoming it.

Let me tell you a secret about me.

I've Quit So Many Different Online Business Efforts That I Honestly Don't Think I'd Be Able To Remember Them All.

So many times in my past I started a program, put a lot of work into it, and then just up and quit. Usually it was because I had purchased ANOTHER course about making money online.

I did this over and over and over. I was pretty much a serial quitter.

It wasn't until I got serious and stuck it out, that I actually achieved success.

The important thing to recognize is that winners are people who often have the desire to quit, but they continue on anyway.

That's the key to online success.

Now, Why Have I Told You All Of This?

Because you'll probably be tempted to quit, too. Maybe you'll watch some of the videos and not like the sound of my voice, or think that some method I discuss isn't going to work for you. Maybe you don't see success as quickly as you think you should. And so you may feel like quitting. Sometimes we are a little too "instant" oriented these days. Maybe your first or second eBay item won't sell like you thought it would. I want you to know that, as far as I'm concerned, it's perfectly okay to feel like quitting now and then – as long as you don't!

Look, Many People Often Quit Right When Success Was Just Around The Corner.

They were almost there... and then they gave up.

Don't let this be you. Don't give up! Keep on fighting. Keep on producing. Keep on working. Keep on improving. That's the true road to success in not only internet marketing, but everything you'll ever do in your entire life.

In closing, let me congratulate you once again on investing in the tested and proven eBay money-making system.

Believe me, I meet people all the time who wish for greater success, but I meet far fewer who, like you, are willing to do something about it.
