

Cheat Sheet!

Steps:

1. Join the Facebook Group. Join the community of like-minded marketers so you can ask questions, provide answers, and work on achieving your goals online.
2. Get your special link to one of the 100% commission funnels. Choose just ONE product to promote to begin. Get your special link, and then move on to step 3.

3. Set up your website. You can use a free WordPress theme hosted by Hostgator. It's cheap and easy to set up.
4. Once your site is set up. Add the product review for the funnel you've chosen to promote. Also, it wouldn't hurt to add some additional content to your blog just for appearances and possible SEO traffic. You can find done-for-you articles you can use as content to add to your site in the Bonus section of the Member's Area.
5. Set up your Bonuses Delivery Page. This is the page containing the bonuses you'll give to people who have purchased products through your site links.

6. Set up your autoresponder software and optin page. This is the software that will house your buyers list and also send out your emails. The optin page will be used in a later step (so make sure you do it!)
7. Add your emails to your autoresponder software. These are the emails that will be automatically delivered to the added list of buyers.
8. Create your instant list by adding the Buyers List to your autoresponder software.
9. Going forward - setting up your next campaign. Add an additional product review to your blog, and then set up “Broadcast” emails promoting the review. The “Broadcast” emails will go

out at the interval you set. Rinse and repeat!

That's it! That's all there is to it. Simply go through this list, one step at a time, and once you've completed every step, you'll have a full-fledged online business up and running!
